### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 17, Non-elected without traverse in the paper filed August 9, 2004, has been cancelled.

2. Claims 1-15 and 18-21 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest a catalyst system comprising the two catalysts claimed in the configuration instantly claimed, i.e. the first catalyst being placed in a forward position and the second catalyst being placed in a downstream position in the exhaust stream.

EP 0 941 757 is regarded by the examiner as the closest prior art. With reference to the Figure, the second embodiment, and Examples 2-40 and 2-41, the reference teaches a catalyst system comprising a first catalyst, which contains a Perovskite ABO<sub>3</sub> composition and a second catalyst, which contains Pt-Rh or Pd-Rh. However, the

Art Unit: 1725

reference teaches that the second catalyst is positioned upstream of the first catalyst, which is in contrast to the configuration claimed and there is no teaching or suggestion that the configuration can or should be reversed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
